

## TEST REPORT N. 19/000425267

date of issue 21/10/2019

Customer ID 0072498

Messrs  
BIM A.S.  
ABDURRAHMAN GAZI  
MAHEBUBEKIR  
CAD. NO:73 SAMANDIRA  
SANCAKTEPE  
Turchia

### Sample information

Acceptance number 19.533009.0012  
Delivered by TNT Traco on 15/10/2019  
Receiving Date 15/10/2019  
Place of origin BIM A.S. ABDURRAHMAN GAZI MAHEBUBEKIR CAD. NO:73 SAMANDIRA SANCAKTEPE Turchia  
Sample Description AFYON AHMET PEK FERMENTE SUCUK (Protocol number: 1002019023702)

### Sampling information

Sampled by Customer

## ANALYTICAL RESULTS

	Value/ Uncertainty	Unit of measure	LoQ	LoD	Start/end date of analysis	Op. units	Row	
<b>ON SAMPLE AS IT IS</b>							1	
EQUINE (Equus sp.) Met.: MP 2151 rev 1 2019	n.d.	%		0,10	17/10/2019- -21/10/2019	01	2 *	
<b>SPECIES IDENTIFICATION</b> Met.: MP 0590 rev 14 2018							01	3
Bovine	present	%		1,0			4	
Pig	n.d.	%		1,0			5	
Horse	n.d.	%		1,0			6	
Ovine/caprino	n.d.	%		1,0			7	
Chicken	n.d.	%		1,0			8	
Turkey	n.d.	%		1,0			9	
Duck	n.d.	%		1,0			10	
Goose	n.d.	%		1,0			11	

### Operative units

Unit 01 : Via Fratta Resana (TV)

### Additional information

Row (2) - Metodo: MP 2151 rev 1 2019 = The method doesn't allow the distinction between swine and wild boar; and there is also a slight cross reactivity between the red deer and the reindeer.

Row (3) - Metodo: MP 0590 rev 14 2018 = Strong industrial heat treatments to which some foodstuffs can be exposed (i.e. high temperature cooking, pasteurization or sterilization) can damage DNA in the sample giving a very fragmented, thus undetectable, structure. Under such conditions the method might give unpredictable false negatives.

### Information provided by the client

- The line marked by a star (\*) is not accredited by Accredia, member of MLA. - If not otherwise specified, the uncertainty is extended and has been calculated with a coverage factor k=2 corresponding to a probability interval of about 95%. - LoD is the detection limit and identifies a confidence interval of zero with a probability interval of about 99%. - LoQ is the limit of quantification. "n.d." is not detected and indicates a value inferior to the LoD. "traces (X)" means a value between LoD and LoQ, this value is indicative. "<x" or ">x" indicate inferior or superior to the measurement field of the test. - If not differently specified, the sums are calculated by lower bound criteria (L.B.). - In case of alteration of the sample the laboratory declines any responsibility on the results that can be influenced by the deviation in case the customer asks for the execution of the test anyway. - If the sampling is not carried out by the laboratory staff, the results obtained are considered referring to the sample as received and the laboratory declines its responsibility for the results calculated considering the sampling data provided by the Customer. The name and contact information of the Customer are always provided by the Customer. - If not differently specified the quantitative microbiological tests (excluded MPN) are performed on single repetition and two consecutive dilutions in accordance to ISO 7218:2007/Amd1:2013. - If there is a specification (customer specifications, law limits) which has been compared to the analytical results, the values shown in bold indicate a result which is out of the specification. - If not differently specified the judgments of compliance /non-compliance eventually reported are referred to analysed parameters and are based on the comparison of the value with the reference values without considering the
